2023 Operating Budget

Executive Summary

This page is intended to be blank

By the end of 2023, Citizens anticipates that it will insure close to 1.7 million policyholders and write more than \$5.1 billion in premium volume. Owing largely to the continued instability within the Florida insurance market, Citizens is expected to write more premium in 2023 than it has in its 20-year history. By comparison, in 2019, Citizens wrote \$877 million in premium and insured roughly 447,000 policyholders – reflecting projected 5-year growth rates in premium and policyholders of 486% and 276%, respectively. As Citizens increases its resources to meet this growth, resource needs associated with Hurricanes Ian and Nicole will also continue into 2023. A hybrid staffing model that relies on a combination of employees, contingent workers and business process outsourcing will be used to support the necessary expansion in operating infrastructure. This staffing model provides Citizens with the flexibility to quickly ramp-up resources while also providing longer-term scalability if growth estimates are not realized or if policy count begins to decline.

Citizens' strategic theme for 2023 has a pronounced focus on investing in corporate initiatives and activities that deliver value and **stabilize** internal business operations and priorities necessary to achieve strategic objectives.

In support of the over-arching theme of Stability, a pronounced and continued emphasis will be placed on five Strategic Objectives surrounding:

1. **Reducing Citizens' exposure:** explore and respond to emerging market conditions, trends and potential opportunities to further reduce exposure while continuing to fulfill our mission as a residual insurer.
2. **Ensuring scalability, flexibility and resiliency in our operations:** foster a culture of innovation, efficiency and effectiveness; ensure operations remain scalable as we address significant policy count fluctuations; ensure administrative costs are appropriate and relative to policy count, revenue and transactional volumes.
3. **Optimally serving our customers:** maximize organizational capabilities to create a best-in-class customer experience.
4. **Reducing litigation and enhancing litigation capabilities:** enhance existing programs and develop new strategies focused on the reduction of litigation and the respective financial impacts associated with litigation defense.

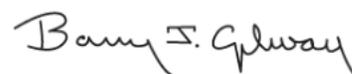

5. **Investing in and leveraging Citizens' greatest resource – our employees:** amplify the employee experience through enhancing our inclusive culture and sense of belonging; optimize a distributed workforce environment; plan for our future workforce and workplace, align resources to business strategies.

As the Florida insurance market continues to find solid footing, Citizens stands committed to serve its policyholders, especially those recently impacted by Hurricanes Ian and Nicole. Notwithstanding the financial impacts of these hurricanes, Citizens expects improvements to the 2023 loss and loss adjustment expense ratios driven largely by year-over-year reductions in litigation rates. However, the increase in policy count will drive an increase in overall loss and loss adjustment expense activity. Additionally, Citizens continues to adjust claims from prior periods when litigation rates were higher, thereby influencing the amount of paid losses and loss adjustment expenses in the coming months and years.

For the 2023 fiscal year, Citizens projects that operating costs as a percentage of premium will be approximately 13.5%, reflecting an expense ratio that is substantially below the average range for private market carriers.

We look forward to another successful year of serving our policyholders, stakeholders and the State of Florida.

Yours respectfully,

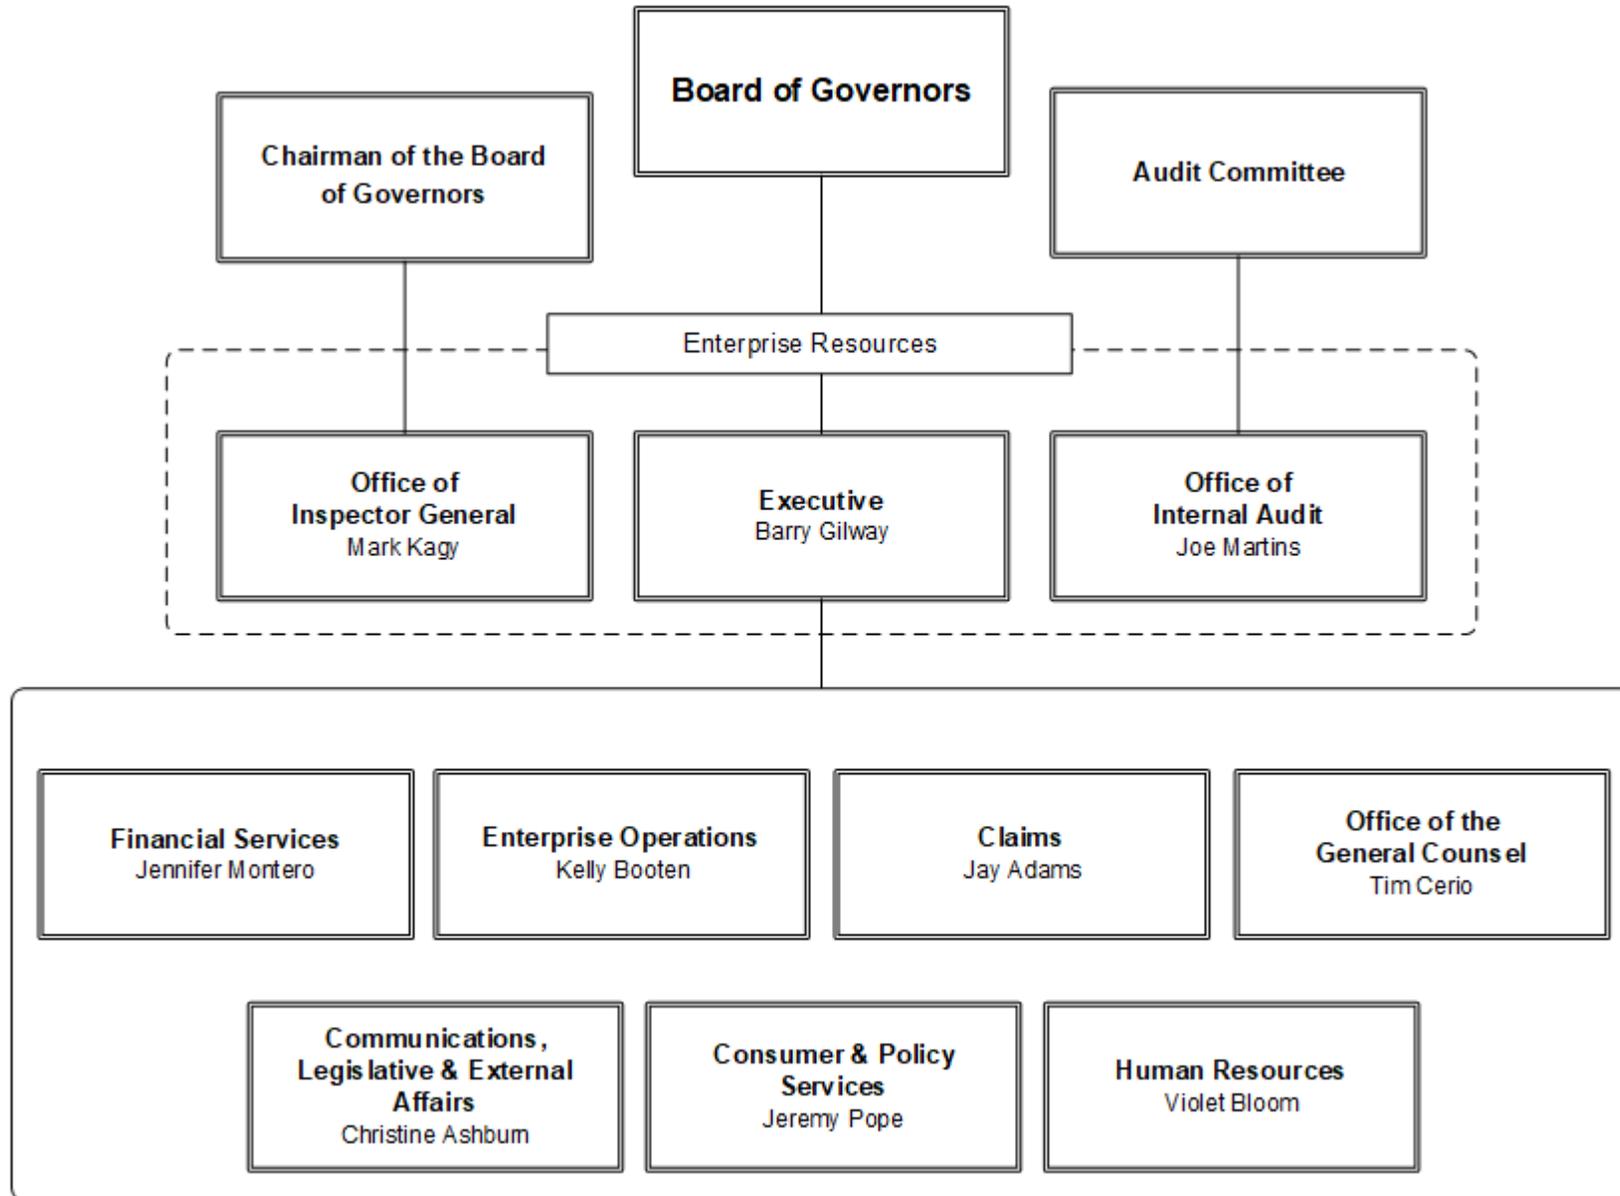

Barry Gilway
President, Chief Executive Officer and Executive Director

Jennifer Montero
Chief Financial Officer

- 1) A loss event for one account will not be the same size event for other accounts. The relative magnitude of an event will depend on the size, severity, and path of the storm. Probable Maximum Loss ("PML") estimates are developed using AIR Hurricane Model for the United States Version 1.0.0 as implemented in Touchstone 2021 (version 9.0.3). All PMLs reflect the 50K US Hurricane - Florida Regulatory Event Set including Demand Surge, excluding Storm Surge, and include a load of 10% of loss to account for loss adjustment expense (LAE).
- 2) Each account is considered separately as required by Florida Statute where deficit calculation and assessments are determined at the account level. However, the PLA and the CLA are evaluated together for FHCF and credit purposes. The loss amounts above illustrate the effect of the accounts aggregated, not combined as one account.
- 3) FHCF recoveries are based on 2022 retention and payout multiples. The actual retention and limits for 2023 may be significantly different from these estimates.
- 4) The private risk transfer program assumed and corresponding recoveries may significantly change due to market conditions and/or Citizens' exposures in 2023.
- 5) PLA resources are fully exhausted with a single 1-10 year storm.
CLA is projected to have sufficient resources to cover a 1-100 year storm followed by a 1-10,000 year storm.
Coastal Account resources are fully exhausted with a single 1-100 year storm.
